On the right side, a 'Draft saved' window is open, showing the email composition interface. It includes a 'Send' button, a dropdown arrow, and various icons for text formatting (bold, italic, underline), attachments, links, emojis, and other features. The email body in the draft window contains the text 'en'.

answer a few questions?

- What operating system do you prefer? (Windows / Ubuntu / DOS / Any)

- Do you have a preferred processor? (i3 / i5 / i7 / Ryzen / Any)

- Do you need a dedicated GPU or will integrated graphics work?

- Any specific use case or preferences like RAM size, storage type, or screen size?

This will help me recommend the best options for you!
