

First Automation Project: client Project Enquiry Automation

Goal

- When someone fills out a form:
 - Send an email notification to yourself.
 - Automatically **label the email** based on the budget selection.
 - High budget → label as High Budget
 - Low budget → label as Low Budget

Tools Used

- Form (to collect lead data)
- Trigger (Webhook or Manual)
- Email (Send message + Apply label)
- Switch or IF utility node (to route based on budget)
- Possibly: Airtable or Google Sheets (to store lead info)
